

TREDAir: A simple and cost-effective way to estimate economic contributions of small airports

TREDAir™ is a simple and cost-effective way to estimate the economic contribution of small airports. It enables users to estimate the basic economic impacts of an airport, based on regional averages of jobs, labor income, and output.

These insights provide an effective way of communicating how an airport makes an economic contribution to the community, especially in between aviation systems plan updates.

It does this by estimating the economic impacts of your airport due to Capital and O&M Spending, On-Airport Tenants, and Visitor Spending.

First enter Capital and Visitor Spending:

TREDAIR
ANALYSIS SPENDING EMPLOYMENT RESULTS

Airport Annual Budget	Capital	Operational
	\$2,000,000	\$250,000
Other On-Airport Capital Expenditures	\$500,000	

COMMERCIAL		GENERAL AVIATION	
# Enplanements (people)	0	# Operations	100,000
% Visitors	0	% Transient operations	50
		Average # of people per operation	4

Visitor Spending Detail Total			
COMMERCIAL		GENERAL AVIATION	
Lodging \$ per trip	\$0	Lodging \$ per trip	\$35
Restaurant/bar \$ per trip	\$0	Restaurant/bar \$ per trip	\$55
Local transportation \$ per trip	\$0	Local transportation \$ per trip	\$42
Retail \$ per trip	\$0	Retail \$ per trip	\$39
Entertainment \$ per trip	\$0	Entertainment \$ per trip	\$13
Total spending \$ per trip	\$0	Total spending \$ per trip	\$184

And then enter Employment information:
