

Technical Advisory – Issue with Exporting Results to Microsoft Excel

Due to a recent (July, 2016) security update to Microsoft Excel (KB3115322), and depending on your current settings within Excel, you may encounter an issue with downloading TREDIS results as a spreadsheet. This issue occurs While Excel may open if which appears not to load the data:

This advisory provides the steps you may take resolve the situation:

- Click the File menu entry at the top left of your screen within Excel and select 'Options'
- Click on the Trust Center link
- Click the Trust Center Settings button
- In the Trust Center window, select Protected View
- Uncheck the first check box for 'Enable Protected View for files originating from the internet' as shown below:

- Then press OK to close the two popup windows.

Note: Implementing this change will allow Microsoft Excel to open all files downloaded from the internet. You may wish to use these settings only while using TREDIS.
