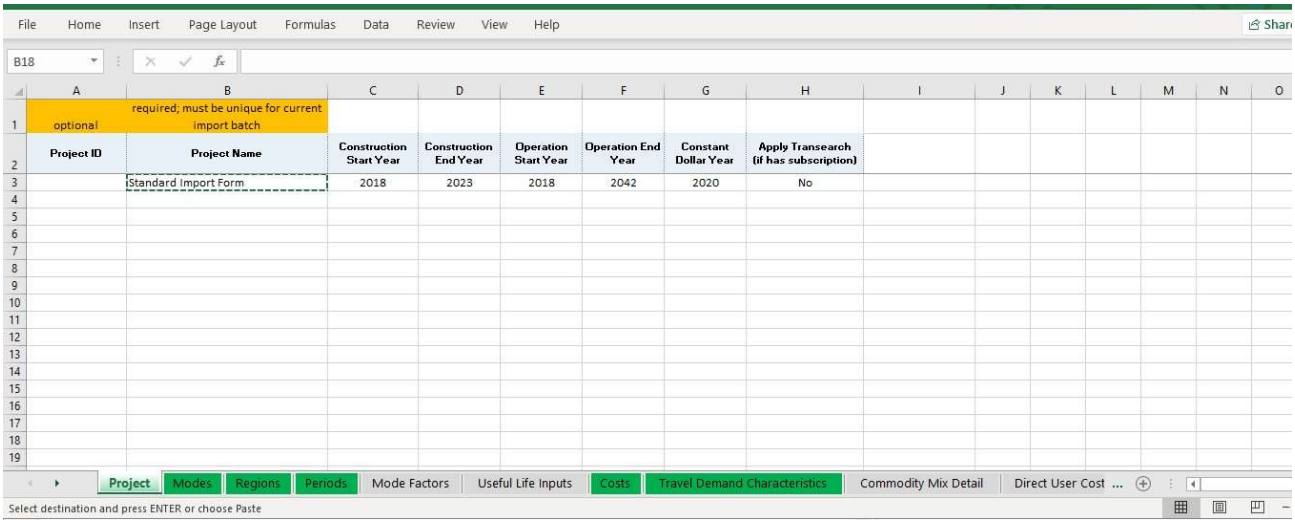
Technical Advisory: Import Spreadsheet Short Form

To reduce complexity in using the Project Import feature, we have now made certain tabs that are not used in your projects as optional for inclusion in the project import spreadsheet. You now only need to include those tabs that are highlighted in green and may leave out of the workbook those that are shown in light gray.

As always, you may obtain the latest spreadsheet template from the User Resources or by creating a project backup within TREDIS.



The required tabs are

- Project
- Modes
- Regions
- Periods
- Costs
- Travel Demand Characteristics

Note – The names of all tabs as shown in the sample spreadsheet must not be changed for the project import process to work correctly.
